## **Gwybodaeth Cyffredinol**

### **Ffioedd Archwilio Diffygion**

### **Gwaith Ymchwiliol**

Pan fydd cwyn gan aelod o'r cyhoedd yn gofyn am ymweld â'r safle ac os canfyddir bod wnelo hynny â diffyg yng ngwaith Deilydd y Drwydded, bydd angen i Ddeilydd y Drwydded dalu ffi, yn ychwanegol i unrhyw ffi archwilio diffyg.

Pan fydd y Cyngor yn dewis creiddio adferiad, bydd angen i ddeilydd y drwydded dalu cost y creiddio, dim ond os fydd y creiddio yn nodi adferiad annigonol. Mae hyn yn ychwanegol i'r ffi archwilio diffyg.

### **Gwaith Brys**

Os nad yw Deilydd y Drwydded yn gallu ymateb i'r angen i ymgymryd â gwaith brys er mwyn gwneud ei safle'n ddiogel, mae hawl gan y Cyngor i ymgymryd â'r gwaith hwn a chodi tâl am y costau a gafwyd.

### **Gwaith Adferol**

Os yw Deilydd y Drwydded yn methu ag ymgymryd â gwaith adferol o fewn y cyfnod a nodir ar y rhybudd, mae hawl gan y Cyngor i gynnal archwiliadau diffyg taladwy pellach a chynnal gwaith adferol os oes angen a chodi tâl am y costau cysylltiedig. Nid yw hyn yn cael gwared ar gyfrifoldeb Deilydd y Drwydded am y warant adfer.

# **CONSTRUCT/ALTER VEHICULAR ACCESS OVER THE PUBLIC HIGHWAY (DROPPED KERB)**

## **Information, Guidance, and Conditions for Applicants**

---

### **Introduction**

A vehicular crossing, often referred to as a dropped kerb, is where the kerbs are lowered from their normal height and the pavement or verge is reconstructed to strengthen it to take the weight of the vehicle driving across it in order to give access into a property. Anyone wishing to construct/alter a vehicular access must apply for permission from Cyngor Gwynedd where a street works licence is granted under Section 184 of the Highways Act 1980. It is the function of the Council as the Highway Authority to monitor licensees' operations under the Act and ensure that the rights of the highway user are protected.

The purpose of this document is to give some guidance and information and provides the conditions that an applicant must adhere to.

### **General Information**

A company or contractor may apply on behalf of the land or property owner, but the licence will remain in the possession of the land or property owner. The person granted a licence under Section 184 of the Act (the Licensee) must also comply with the relevant duties and responsibilities imposed by New Roads and Streetworks Act 1991, the Traffic Management Act 2004 and the associated Secondary Legislation and Codes of Practice. Those applicants not familiar with the requirements of this legislation are strongly advised to appoint a contractor with the appropriate knowledge and accreditation to help complete the application and conduct the works on their behalf.

The legal responsibility to comply with New Roads and Street Works Act 1991 belongs to the Licensee and non-compliance can lead to significant financial penalties or prosecution. A Licensee may employ a sub-contractor but the liability cannot be delegated to any other person or organisation.

### **Applying for the licence**

You would need to consider the following points before applying for a Section 184 licence.

- If you are the tenant of a housing association or other leasehold property, you should seek the consent/agreement of your property owner.
- If you are the owner of a previously owned local authority property you must consult with the relevant housing authority e.g Cartrefi Cymunedol Gwynedd
- There must be sufficient space on your property to park a vehicle without it overhanging the public highway. The area must measure a minimum of 6 meters in depth from the building to the front boundary of the property and 3.6 meters in width allowing sufficient space for gates and to walk around the vehicle. Parallel parking adjacent to the footway or verge will not be considered.
- It is advisable that you create the area within your property to park the car prior to constructing your dropped kerb. Please also see the section on planning permission.
- Any gates fitted must open inward.
- If there is any street furniture, such as a road sign/street lighting columns in the proposed

position of the access, the location should be altered to avoid the obstacle if possible. If this is not feasible, then the applicant will have to pay for the cost of the relocation of the street furniture.

- If there is a tree within the verge outside the property, then any new access must be located so that it does not disturb the roots. This is essentially the area covered by the tree canopy. Highway trees will not normally be removed to facilitate a dropped kerb.
- If an existing access to a property becomes redundant due to the installation of a new access in an alternative location, the pavement will need to be raised back to the original level as part of the works.

Once you have considered the information above, and wish to apply for the licence, please complete the application form and return it to us via e-mail or post (addresses shown on the application form).

All permits required for work affecting the highway i.e. Temporary Traffic Lights, Road Closure Order/Notice, must be applied for, and the permits granted, before any work is commenced. Your contractor may be able to advise whether or not these are necessary.

- If a Road Closure Order/Notice is necessary to safely carry out the works, this will require a separate application and approval. An application form can be obtained by telephoning 01286 679769 or by visiting <https://www.gwynedd.llyw.cymru/en/Businesses/Licences-and-permits/Roads-and-highways-licences/Temporary-Road-Closure-Applications.aspx>
- The provision of any Temporary Traffic Lights which may be necessary will require separate approval. An application form can be obtained by telephoning 01286 679769 or by e-mailing [gwaithstryd@gwynedd.llyw.cymru](mailto:gwaithstryd@gwynedd.llyw.cymru)

### **Safety Considerations**

Any application may be refused or modified on the grounds of safety. We will not approve an application if we consider that the vehicle movements may be hazardous. When deciding whether to apply for a Section 184 licence, these points need to be considered.

- You need adequate visibility to be able to see other vehicles and pedestrians using the highway when you enter and exit your drive.
- Proximity to a junction
- Proximity to pedestrian crossing
- Proximity to traffic calming/traffic islands that would make turning difficult
- Proximity to bus stops

This list is not exhaustive and each application will be considered on its own merits.

### **Planning Permission and Consent**

Applicants (homeowners), intending to construct a vehicle crossing must contact their Local Planning Authority, as planning permission may be required. Where required planning permission must be obtained prior to submitting this application.

The formation or alteration of vehicular access on to Classified Roads (i.e. Trunk, Class 1, 2 and 3 Roads) will require planning permission from the Local Planning Authority. Works on Unclassified Roads will not require planning consent however will be subject to conditions proposed by the Highway Authority.

If applicable, a copy of the planning approval must be submitted with this application form.

### **Following Your Application**

Once your application has been received a site inspection will be undertaken to see whether it can be approved or not. Our inspectors may contact you or the appointed contractor if they require any further information.

If your application is successful you will receive the licence approximately 15 working days following the submission and will be valid for three years. If the works are not implemented within that period, the permission will lapse and you will have to re-apply. If your application is not successful, you will receive reasons in writing why it has been refused. You may appeal to a magistrates' court against the refusal or conditions if you wish to do so.

- Once you have appointed the contractor, agree with them when you would like the work to commence and give notice of the intended starting date to the Street Works unit– this is done by completing the 'Part N' notification form enclosed. Please note that the form must be returned as proposed on the works category table stated on the 'Part N' form. If the work does not start on the agreed dates the applicant must forward a new 'Part N' notice form.
- The Licensee is encouraged to ensure that the works are carried out to the timescale specified on the 'Part N' form. Failure to do so could result in charges being applied by the Council under Section 74 of NRSWA. The current maximum charge is £2,500 per day should the works over run.
- Once the works have been completed, you will need to submit the PART R1 form within 10 working days. The future maintenance of the crossing will be the responsibility of the Authority. However if within the first two years following the completion of the works remedial work needs to be undertaken due to poor workmanship or because the works have not followed the agreed specification the contractor/licensee will be notified of required works/action and will be liable for any costs associated with such.
- Failure to send any of the above mentioned forms could result in the issue of a Fixed Penalty Notice, in accordance with the current NRSWA Regulations, or possible prosecution.

### **Statutory Undertakers**

- The applicant will be responsible for ascertaining the location of any apparatus prior to carrying out excavation on site. Any information provided by the Highway Authority is given for general guidance only on the understanding that it is based on the best available information and the applicant should not rely solely upon such information where excavation or other works are to be made in the vicinity of apparatus in the Street.
- Should the statutory undertakers object to the location of works then the applicant must ensure compliance with any conditions set by the Statutory Undertakers under the Highways Act 1980 to prevent damage or ensuring access to apparatus of statutory undertakers.

### **Reinstatement**

- Once the works are completed to a satisfactory standard the 2 year Maintenance Period may begin. During this time you will be responsible for any defects in the works.
- The Licensee must indemnify the Council against all and any claims made by a third party in connection with any aspects of the works. This liability extends to the end of the guarantee period for the reinstatement.
- Licensees are encouraged to carry out a permanent reinstatement of the highway immediately on completion of the works. Care must be taken to follow the requirements of the NRSWA Code of Practice, Specification for The Reinstatement of Highways particularly those relating to layer thicknesses and compaction.
- The access must be constructed to the correct specification, vehicular crossing construction, unless otherwise stated on your licence.
- If highway storm drainage systems laid under the vehicular crossing are to be exposed, concrete protection 150mm deep is to be placed around and above the pipe construction.
- It is an offence under the Highways Act 1980 to allow water to discharge on the highway. As such any water must be contained and disposed of within the property, such as through a soak away.
- Where an existing footway is being altered, the full width of the footway must be reconstructed to give an even cross fall from the back edging to the front of the new kerbs. There must also be an edging kerb placed at the rear of the reconstructed footway.

All the conditions are imposed

- In the interests of safety
- To minimise the inconvenience to persons using the street, having particular regard to people with a disability; and
- To protect the structure of the street and the integrity of apparatus within it.

### **Defect Inspection Fees**

Following reinstatement of the works, if the Council identifies any defect the Licensee is required to pay a fee to cover inspections the Council carry out to ensure remedial works are satisfactorily completed.

### **Investigatory Works**

Where a complaint from a member of the public requires a visit to the site and is found to result from a defect in a Licensee's works, the Licensee is required to pay a fee, additional to any defect inspection fee.

Where the Council chooses to core a reinstatement, the licence holder is required to pay the cost of

the core, only if the core identifies an inadequate reinstatement. This is additional to the defect inspection fee.

---

### **Emergency Work**

If the Licensee is unable to respond to the need to carry out emergency work to make their site safe, the Council has the right to carry out this work and recharge the costs incurred.

### **Remedial Works**

If the Licensee fails to carry out remedial works within the period stated on the notice, the Council has the right to carry out further chargeable defect inspections and if necessary undertake the remedial work and recharge the costs involved. This does not remove the Licensee's responsibility for the reinstatement guarantee.
