

ACKNOWLEDGEMENTS

It is not possible to name individually all those who have contributed to the development of Natur Gwynedd over the past five years. Authors and consultees are listed within the individual Species, Habitat and Topic Action Plans which have been published; however thanks are also due to those who compiled initial drafts and commented on many other Action Plans which will be published over the coming years. Neither would production of Natur Gwynedd have been possible without the enthusiasm, support and guidance of all those members of the various working groups and steering group who are too numerous to name.
