### Crynodeb o'r Sylw:

Mae Dŵr Cymru'n cefnogi'r gofyn y dylai cynigion ymgorffori mesurau cadwraeth dŵr lle bo'n ymarferol, gan gynnwys Systemau Traeniau Trefol Cynaliadwy. Mae mynd i'r afael â dŵr wyneb yn y man mae'n tarddu yn elfen hanfodol o ddatblygu cynaliadwy a bydd yn mynd yn bell iawn i liniaru yn erbyn carthffosydd sydd wedi gorlwytho a all, yn y pen draw, arwain at lifogydd. Mae Deddf Rheoli Llifogydd a Dŵr 2010 yn ategu'r rhwymedigaethau i ddatblygwyr ymgorffori systemau draenio cynaliadwy fel rhan o'u datblygiadau.

### Representation Summary:

DCWW support the requirement that proposals should incorporate water conservation measures where practicable, including Sustainable Urban Drainage Systems (SUDS). The tackling of surface water at source is a vital component of sustainable development and will go a long way to mitigate against overloading sewers which can ultimately lead to flooding. The Floods and Water Management Act 2010 reinforces the obligations for developers to incorporate sustainable drainage systems as part of their developments.

### Sylw Llawn / Full Representation:

DCWW support the requirement that proposals should incorporate water conservation measures where practicable, including Sustainable Urban Drainage Systems (SUDS). The tackling of surface water at source is a vital component of sustainable development and will go a long way to mitigate against overloading sewers which can ultimately lead to flooding. The Floods and Water Management Act 2010 reinforces the obligations for developers to incorporate sustainable drainage systems as part of their developments.

### Newid(iadau) i'r Cynllun

### Change(s) to the Plan
