Our Teams!

Social Care services within the Council can be divided into :

- Children and Supporting Families
- Adults, Health and Well-Being

More details about our teams can be found in the following pages.

Children and Supported Families

The Children and Supporting Families department provides various Social Care services for the residents of Gwynedd.

The department's purpose is to ensure that the children and young people of Gwynedd are protected from harm; experience stability in their life and have the best health and well-being opportunities.

There are several teams within the Children and Supporting Families department. The department works within 3 tiers of need;

1. Early Intervention,
2. Care and support, safeguarding, and care needs
3. Specialist Teams.

In Gwynedd, we believe that every child and young person should be given the opportunity to reach their full potential. We recognise that children develop best when they are supported to grow and succeed within their families and communities. We also recognise that providing early intervention is critical in helping children and their families to thrive and to reduce the need for more intensive services.

The Adults, Health and Wellbeing department provides a large number of different services to support the residents of Gwynedd. A small but very important percentage of the services provided are our residential homes, day services, and home care. The objective of our internal services is to provide a service to enable, support and promote people to live fulfilling lives as independently as possible. The department focuses on the user's life, offering a flexible service, completely person-focused based on quality and emotion. The department will promote the individuals who use the service to have a voice, control and choice over their own lives and the services they receive.

The department's purpose is to enable the adults of Gwynedd to 'live my life as I wish'.

Learning Disabilities Team

The purpose of the services is to address and promote the well-being needs of individuals with learning disabilities. Whether that be physical, emotional, mental, or social needs. It is necessary to ensure that the services address what is important to individuals with a learning disability and their carers.

To ensure that the needs of individuals are fully met, a wide range of services will often be offered in partnership. This can be support to live independently, support out in the community, and much more.

The Learning Disability service focuses on the provision that offers opportunities to socialize and maintain relationships. There is a focus on developing a community-based service through the local hubs and offering a service that is led by the individuals and their carers.

The Learning Disabilities field is so diverse. It is an opportunity to gain experience and skills to improve your understanding of how to support individuals with complex and intense needs. There is great scope for development in the field.

Often, they will make assessments on individuals who come home from the hospital, for example, seeing what adjustments need to be made to the home for the patient to live a comfortable life e.g. putting in a stairlift, arranging for a wheelchair to be available, etc.
