# 1a Supported housing for the homeless schemes

A series of 'supported housing' developments to be able to house individuals, couples and families who face homelessness and require urgent temporary accommodation. This will allow us to avoid placing people in unsuitable accommodation (e.g. bed and breakfast) and enable us to provide the support required to assist them to develop skills to live independently. The support could be on site or mobile in nature.

# 1b Supported housing for homeless young people

With the support of a regeneration grant from Welsh Government, we will remodel and upgrade the Nat West and GISDA building in Caernarfon to provide four flats for homeless young people; one flat to train young people to be able to live independently, an extension to the existing café to create employment for the homeless, creation of a permanent suitable home for GISDA and the to create a space for multi-agency support for homeless young people.

# 1c Self contained units for individuals with intensive social needs

Housing some vulnerable individuals with intensive social and behavioural needs is very challenging and, as a result, we currently place them in unsuitable bed and breakfast accommodation. They receive intensive multi-agency support but suitable temporary self-serviced homes are required if they are going to be given an opportunity to be in a position where they can sustain a tenancy independently.

# 1ch Support packages for private landlords

Our ability to house homeless individuals relies on the support of the Housing Associations and private landlords. A support package for landlords is required if they are to be encouraged to offer a tenancy to local people who need housing rather than letting them for short term periods. The Government is currently trialling such a support package.

# 1d Specialist mental health support

Supporting tenants to remain in their homes is an essential part of our strategy to prevent homelessness. If we cannot prevent homelessness, then we will need to further increase our accommodation options and provide more homes and support, which is costly. The percentage of tenancies under threat due to mental health matters is increasing every year and there is a need to increase the expertise within the team to assist these vulnerable individuals to avoid losing their tenancy.

# 2a Build more social housing than what can be funded through the social housing grant

It is possible to speed up the social housing construction programme by funding the gap in individual business cases using our own funds rather than depending on the Social Housing Grant alone. We can realise this by a partnership with the Housing Associations or by constructing them ourselves. We will prioritise one and two bedroom units in order to respond to the demand on a County level.

## 2b Redevelop the Polish Care Home site in Penrhos

Work in partnership with the owners (Clwyd Alyn Housing Association) to ensure that the Polish Care Home in Penrhos receives significant investment to re-develop the existing living units to high standard homes to local people. We will work with the local community to ensure that the offering on the site is based on the local need and we will be concentrating initially on the care accommodation needs rather than general housing.

This scheme will be delivered by:

## 2c Purchase of former social housing and renting them to Gwynedd residents

Purchasing former 'Council houses' that are on sale would be a way of increasing the number of social housing available for rent by local people. It would be possible to focus on housing with a local person clause (or S106 agreement housing) in the first instance. We will need to ensure that the houses are of an acceptable standard and aim to reclaim our investment by means of rental income.

# 3a Develop our own housing in order to increase the opportunities for Gwynedd residents to compete in the housing market.

We know that one of the main challenges in the housing field is the inability of local people to purchase/rent their own homes in Gwynedd as they are too expensive. We will develop our own houses which will increase the housing stock in those communities where demand exists. We will consider a variety of tenure models in order to ensure that these houses are within the ability of local people to buy them. Initially, we will look at using sites in our ownership in Bala, Harlech, Bangor, Llanfachreth, Llanaelhaearn, Ffôr, Rhoshirwaun, Llanberis, Llanllechid and Barmouth. These houses will remain affordable in perpetuity.

# 3b Purchasing private housing

The business case to purchase former Council houses is equally as applicable to other houses on the market. Gwynedd has a higher rate than the rest of Wales in terms of the number of vacant houses in our communities – 1200 at present. These are ready-made stock of houses that would be suitable to house local people and we can focus on these in the first instance. We will maximise our efforts in this field and consider purchasing houses of this type and let them to local people on an intermediate rent.

# 3C Consult with communities to establish their housing needs

Although we are aware that the demand for housing is higher than the affordable supply available in Gwynedd, further work is required to establish and quantify the exact need in all areas of the county. This will not prevent us from being able to commence our plans but as we proceed we will need to know in advance where exactly the need for different types of homes is and continue to keep this information up-to-date in order to support our efforts in this field.

Historically, the Council in some cases has agreed to remove the local person condition imposed on sales under the Right to Buy scheme within the National Park and the AONB. We have room to consider being more challenging with such applications and to adhere to the original purpose of such clauses.

This scheme will be delivered by:

# 3d Self-build plots

Take advantage of Welsh Government's scheme to prepare sites for housing developments through the 'self-build' model. Assist local individuals to go through the self-build process. However, if we are to continue after that, we will need to be prepared to respond quickly to purchasing building land when the opportunity arises in the right places. We will also need to ensure that the land is suitable and mature for development in order to be able to act quickly when opportunities arise.

Establishing a new service to respond to the host of applications from community groups asking for support to deliver renewable energy schemes and to improve the ability of Gwynedd residents to avoid fuel poverty. At present, our communities are missing out on opportunities to deliver schemes due to the lack of technical expertise and the need for support to draw up business cases. The service will be available to advise, help with business cases and grant applications and to run energy conservation projects.
