Develop your Welsh language skills

Do you want to improve your Welsh language skills so you feel more confident using Welsh with the people you care for and support?

Social Care Wales has partnered with the National Centre for Learning Welsh on Work Welsh.

This is a national programme to help more social care workers learn Welsh, so you can communicate more comfortably and effectively with the people you care for, in their language of choice.

As part of this work, you can:

- Test your speaking, reading, writing and listening abilities in Welsh with an online tool
- Sign up to online courses
- Take part in face-to-face training all over Wales
